FOR IMMEDIATE RELEASE

Appigo Launches New Todo Pro App for Android on Google Play With Task Management and Collaboration for Business and Teams

Appigo just released Todo Pro for Android in beta as a companion app for their collaborative task management solution, Todo Pro. The service now provides task sharing, sync, and assignments between iOS, Mac, and Android devices.

Orem, Utah - May 23, 2013 - Appigo today announced the availability of the first public beta version of [Todo Pro for Android on Google Play](#). [Todo Pro](#), the company's collaborative task management service, gives people an environment for sharing, delegating, and synchronizing tasks with others.

"We've had a lot of business customers who are extremely interested in sharing their team's tasks between iPhones and Android devices," explains Calvin Gaisford, Appigo's CEO. "We're thrilled to offer our flagship product, Todo Pro, to our customers who've switched to Android."

Todo Pro helps people work together to get things done. Task list sharing is the heart of what makes Todo Pro so valuable to businesses and groups of people. A shared list lets people make task assignments, add comments, and even receive email updates when something about a task changes.

When someone receives an email notifying them that a task in their shared list is updated, it saves them time from launching another app to see what's going on with a particular project. They can also reply directly to the email, and the reply is automatically added as an additional comment on the task. Everyone included in the shared list can see the new comment.

Appigo began sharing early beta copies of the Todo Pro for Android app with a limited group of customers in February of this year. Since then, they've gathered important feedback from Android customers. The private beta has resulted in a very stable public beta app now available on Google Play.

Todo Pro is now a very attractive solution to businesses and teams that have mixed iPhone and Android environments. Projects, checklists, and tasks can be shared with team members to get things done as a group.

Pricing & Availability

Todo Pro is a subscription-based service available online at <https://www.todopro.com>

Basic web accounts are free. Premium accounts are free for the first 14-days and allow synchronizing and sharing tasks with mobile devices. Premium accounts are available for \$1.99 USD per month or \$19.99 USD per year.

Mobile and desktop companion apps are available for free download for [Mac](#), [iOS](#), and [Android](#).
